QIANJIA CENOSPHERES

Material selection inquiry checklist

Use this checklist to prepare a focused discussion about grades, samples or supply.

01 / Application and process

What product will you make? Describe the formulation or matrix material, processing conditions and material goals.

02 / Particle size

Provide the required range, mesh size or particle-size distribution. Include units and the sieve standard or measurement method.

03 / Density

Specify the density type (for example, bulk or particle density), target value or range, and units such as g/cm³ or kg/m³.

04 / Composition, where specified

Share existing alumina, carbon or other composition requirements with units and test methods. You may begin the discussion without complete figures.

05 / Samples and purchasing

Explain the sample test application, requested quantity, packaging needs and desired supply schedule. Specific terms are agreed during discussion.

Email your requirements to Qianjia using the address below. The website inquiry builder can prepare a summary to copy, download or open in your email app. It does not send inquiries automatically.
